

Work Principle

WIRELESS LIKE NO OTHER

The GMT-Easy-Vu uses 2.4Ghz from the call point to the internal gateway, where a network cable plugs into your broadband. No longer do we have to rely on poor WiFi signals and video buffering.

WHAT THE UNIT OFFERS

GMT-Easy-Vu gives you the freedom to operate anything, anywhere! From a free APP, you can trigger the relay from the APP. An unlimited number of users can access the video intercom, and all will ring on a visitor press of the call button. Unlocking or activating of the relay is done by pressing the padlock and entering the code. Motion detect and missed call events can be viewed from the APP provided an SD card is installed.

INNOVATIVE SECURITY

GM Techtronics already provide a great range of security products and services. If you have a product requirement that you need to be designed, we can complete the R & D for you and produce products tailored to your specific needs.

Introducing the new GMT-Easy-Vu Innovative Wireless Security Products

The need for protection, security and safety is vital to our everyday lives. Not only for our valuables such as our homes, businesses and vehicles but for your staff too.

We are pleased to be able to offer a wide range of affordable systems & solutions to assist with your wireless security needs.

We pride ourselves on build quality, performance and reliability.

TECHNICAL SPECS:

- > **Powered by:**
Rechargeable 5000mAh Battery
1W-2W/Average $\leq 200\mu A$
- > **Camera:**
1 Megapix 720P 170 degree view
Adjustable 1280*720 to 640*480
- > **Specs:**
IP55 rated, $-20^{\circ}C > +50^{\circ}C$
4x IR lamps for night vision, PIR
- > **Output:**
NO NC relay output
10A relay @ 30VDC 125VAC
- > **Other Information:**
Unlimited Users
Does not use WiFi
W64.5*D30*H28mm
Motion Detection
4 hours to recharge call point battery
7 Inch Monitor in design stage
Internal gateway powered by 5VDC
32GB SD card to record missed calls
(SD card not supplied)
