

The D4200 Full height turnstile is a very high specification turnstile that is suitable for controlling access in environments such as reception areas, public buildings, theme parks, stadiums and construction sites etc.

The D4200 turnstiles are extremely robust, they can be formed into a double and are manufactured in the UK .

These turnstiles if wished can be tailor made to your requirements; such as heights, access plates, stainless rotors, Colours, etc.

The D4200 turnstile is a very unique design that incorporates a canopy as standard. Also as standard comes a Siemens plc which has a built in time clock and various parameters that puts the D4200 above the rest.
