GALEO 4.0 Bluetooth

Weatherproof Illuminated Keypad with remote electronics

Thank you for purchasing this product and for the trust you have placed in our company.

1] INTRODUCTION

The GALEO Digicode®, leader on the keypad market, can now be managed using two smartphone apps. A specific app for the installer and one for the end user.

These two free apps can be downloaded from the App Store and from Google Play.

2] APP DESCRIPTION

A. INSTALLER APP:

With the CDVI app, you can directly program your Galeo from your smartphone. This includes the possibility of programming the illumination Keypad duration and setting the unlock time. The Keypad comes with the factory default values.

The user codes can be added, modified or deleted with the ADD

B. USER APP:

The user app must be installed and active on the smartphone before the file sent with the user codes can be opened

Note: a password must be entered to activate the app and then reply to 3 questions. This questions will help you reset the password. This process takes a few minutes.

As soon as the "submitted" file is opened in the app, you will find the user codes. If you receive the user codes for different Galeo Keypads (several doors or homes), the user codes hosts will appear in different format in the list

This same app can be used by visitors (guests, personal services, holidaymakers, etc.).

As a user, you will see the assigned codes permanently in the "User codes" box. You can share this user code with a visitor either permanently or temporarily. The user code is invisible in the app and therefore unknown. Visitors will find the access form in "Contacts".

3] FIND THE APPS

Both apps can be downloaded from the APP Store or Google Play. Search for CDVI

GALEO 4.0 Bluetooth

Weatherproof Illuminated Keypad with remote electronics

A. "CDVI" INSTALLER APP:

Make sure your smartphone Bluetooth is active to use this app. Before launching the app, you need to know the master code your installer has set up during the installation.

Master code _____

1. Searching for the BOXCODE

Once the app is open, select "Connected box" to see in the range BOXCODE. The nearest BOXCODE according to the RSSI value, will be displayed.

The lower the RSSI value, the nearer the BOXCODE.

For example: "RSSI - 40" is closer than "RSSI -60".

2. In the Settings

To optimise your management, it recommend to rename the BOXCODE.

You can define sub-master codes (see installation manual), permanently activate the audible feedback code length from the digit keys

3. Setting user codes.

Your Digicode® can control a maximum of 3 relays (for example: doors, gates, alarm...).

You can create unique codes for each relay. When creating a code, you should enter the relay name once (for example, 0 front door), then enter your own unique code.

You can create

- 60 codes for relay 1
- 20 codes for relay 2
- 30 for relay 3.

4. Creating and inviting users.

In the user menu, you can assign user codes to permanent users (owners, tenants, etc.), and then send them an invitation by email.

This invitation is a file containing encrypted rights for the user and can be opened in the user app.

To create a user, enter all the fields until the OK symbol at the top right is active.

B. "DIGICODE®" USER APP:

The access rights you receive from the manager can be opened in the Digicode® app. Download the app from the App Store or Google Play and activate it by creating a password (required to launch the app)

Open the email from the manager and press the submitted file for a long time, you can then choose the application in which the file will be opened in.

Once the file is open, you will get the following screen on start-up:

Make sure the 3 "message", "location" and "open without password" options are enabled in the options menu

In the "user codes" tab, you can see the BOXCODEs you received and the user codes. This can be for several devices

You can see the location of your Digicode® on the map

You can open the door via the Bluetooth using the door icons. You also can use the user code assigned to you for each door

The Share button icon, allows to share your access rights with other people. This can be either permanent or temporary and limited in time and/or number of uses. With shared access, you can also select the door or doors you want to share.

In the "Contacts" tab, you can see the BOXCODEs you have been invited to by another user. In case, the door code is not visible then you cannot open the door via Bluetooth. The rights expire according to the schedule and doors set by the host.

The icon to open the door is only visible during the period in which the rights are valid. Then the icon disappears.

If the rights have expired. You can remove the access using this trash icon.
