

# ALUMINIUM GATES AND FENCES

*Choose with confidence...*

**LA TOULOUSAINNE**

ALL YOUR  
NEEDS  
HAVE ONE  
SOLUTION!

# CHOOSE WITH CONFIDENCE...

## LA TOULOUSAINE, 60 YEARS OF TRUST!

Over six decades, La Toulousaine has mastered designing reliable products with impeccable quality.

Our experts and industrial resources are grouped together at our Toulouse site. Our often patented accessories are tested at length in our test center. Three hundred technicians, designers, operators and customer service providers work together for greater responsiveness: every situation has a solution!

Sixty years of history has led to the construction of the biggest network of recommended professionals in France. A good product also with a high quality installation.

With more than a million products installed in Europe, La Toulousaine, a French manufacturer, is undeniably a premium supplier.

# ALUMINIUM A HIGH QUALITY MATERIAL

Light-weight

Mechanical  
Strength

100%  
Recyclable

Resistant to  
corrosion

*For your and your children's  
safety, all our gates comply with  
the EN 13241 + A1 European  
Standard*

## PATENTED EXPERTISE

### MECA'CLAV® ASSEMBLY SYSTEM

Designed to last and made to measure, LA TOULOUSAINNE solutions benefit from MECA'CLAV® technology which ensures the perfect rigidity of the frame without altering the design of the product.

#### RESISTANCE

Our innovative and patented assembly principle ensures flawless hold over time.

#### STURDINESS AND FINESSE

Composed of multi-chamber sections, our MÉCA'CLAV® system gives our gates exceptional strength while offering the finest lines on the market.

## POWDER COATING A FAVOURITE FOR HIGH END PRODUCTS!

### A PERFECT FINISH

We carry out the lacquering of our gates after assembly on our automated line, guaranteeing flawless quality.

Total control of the powder coating process allows for uniformity and a great diversity of colours and textures. Confident in our quality, we guarantee our paint for 10years(1).

### LACQUER

La Toulousaine has chosen AkzoNobel Powder Coatings, a world leader of powder coating. All selected powder coatings meet the Qualicoat Class 2, GSB and AAMA 2604 standards and have over 30 years of experience.

The original Interpon collections adorn prestigious monuments all over the world, such as The Shard in London and the Tour First in Paris.

# DARE TO BE DIFFERENT PERSONALISE THE COLOURS!

High end  
Class 2  
lacquer

## GREAT CHOICE OF COLOURS AND TEXTURES

Because it is the first visible element of your home, your gate must be remarkable. This is why La Toulousaine only uses paints with Qualicoat Class 2, GSB Master and AAMA 2604 certifications.

Formulated in high durability Interpon D2525 polyester, they have excellent UV resistance and meet the most stringent requirements.

- **The Structura Collection**

- The Structura D2525 Collection offers Ral colors in textured finishing, which are highly resistant to wear, scratches and impacts.

- **The Futura Collection**

The Futura Collection, designed in collaboration with the International Style Agency Peclers Paris, combines colour and light with metallic effects and goes beyond with sandblasted aspects.

The aesthetics of its fashionable hues, linked to excellent properties make it a favourite for architects. Let your wishes run wild and personalise your gates, barriers and fences.

## STANDARD

- Structura: 18 matt aspect colors, lightly structured

## OPTIONS

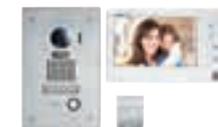

- Structura : 10 matt aspect colours, lightly structured
- Futura : 15 matt aspect colours, finely sandblasted and metallic
- RAL : 60 smooth aspect colours
- Wood decor: medium oak look(1)

# THE SECRETS OF OUR SWING GATES

Flashing light

Adjustable photocells

Aesthetic  
and simple

OPEN BY PHONE

## DAILY COMFORT SLIDING GATE

### MOTORS ON THE GROUND

Pedestrians, cyclists or motorists, the motorisation of your sliding gate offers an opening style adapted to your daily life.

- Partial opening for pedestrians
- Remote control
- Stops when blocked

### INVISIBLE TOTEM MOTOR: AESTHETIC AND FUNCTIONAL

Truly focused technology, our TOTEM motor is completely integrated into the design and colour of the gate.

- Sleek design
- Quick opening
- Anti lift-off and anti vibration guides

Remote controls

Wireless flashing light

Adjustable wireless photocells

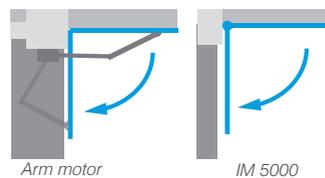

# YOUR NEEDS OUR SOLUTIONS

## REDUCED SIZE (SWING GATES)

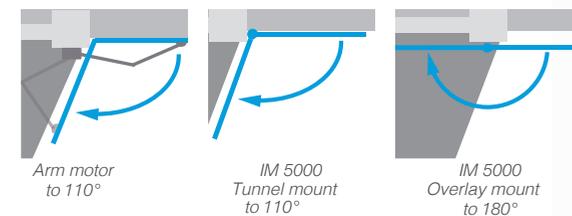

Choose from our range of motors the style which fits your needs.

With reduced size and internal or external opening, **the IM 5000 motor** can meet any requirements of off-slope installation.

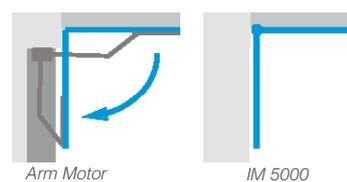

Standard opening

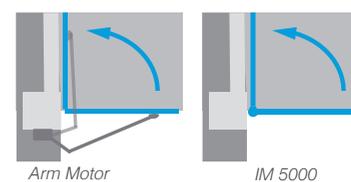

Large opening angle

Reduced sideroom

Outwards opening on private path

## OPENING ON A SLOPE

By developing the installation on the bar and the adjustment of the slope in factory, La Toulousaine ensures a highly functional mechanical operation in a situation that was previously deemed too difficult (manual gates only).

---

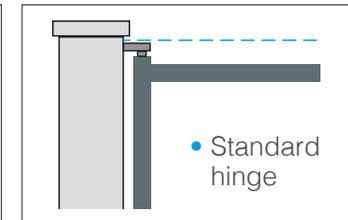

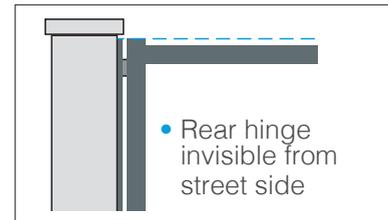

### CABLE CROSSOVER

- Avoid bleeding
- Allows a perfect installation
- Rectifies a slight false ground level
- Resistant to the passing of all vehicles.

---

### MAXIMISE HEIGHT

---

### ALUMINIUM PILLAR

- With or without sealing
- Painted the colour of the gate
- Invisible ground fixings

---

### INTEGRATED METRE OR LETTER BOX

- Fence unit for letter boxes or metres

# INNOVATION & PERSONALISATION

With years of research and development, La Toulousaine has been able to industrialise the expertise of craftsmen so that each gate can be unique. You design it and we will make it!

## TRUE PERSONALISATION

- Our technology allows you to transpose your wildest ideas. Do you want to send a message, or highlight a passion? Use your gate as a means of communication.

You can provide a high definition photo or logo

## A CLOSER LOOK AT SHEET METAL GATES

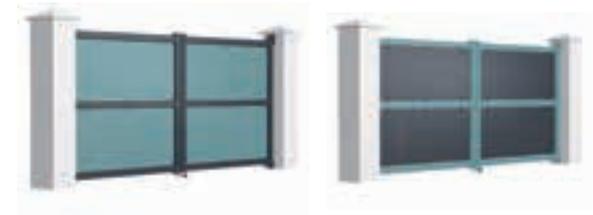

*"We manufacture all our sheet metal gates from full steel sheets that we punch in accordance with the size of the gate. This unique process ensures the proper sizing of the pattern, as well as perfect symmetry and routing between the frame and the filled sections. In this way, holes or grooves never overlap the frame. Finally it's quite simple: every gate we make is unique!"*

## SEE LIFE IN COLOUR

- Our Intuition, Arpeggio and Melody lines allow you to combine several colours. A simple nuance or complete contrast, two-toned is open to you.

## BEAUTIFUL MATERIALS

- Wood is back. Its warmth is unrivalled, and it matches so well with aluminium. Very popular with lovers of architecture, mixed aluminium and wood is a safe bet.

Walnut

Aged pine

## HARMONISE!

We also design and make garage doors. We offer coordinated sets of gates, garage doors and rolling shutters.

Play with the colour, a message, a pattern or windows.

- (1) Solar and IO operation are not compatible  
 (2) RTS Tahoma compatible without feedback  
 (3) IO Tahoma compatible with feedback  
 (4) 1 cycle = 1 open + 1 close

# ACCESSORIES

## OPENING BY PHONE

Technology for comfort at home: control the opening and closing of your La Toulousaine gate using your smartphone and our dedicated app. With this function, there is no question of forgetting codes or remote controls.

- Opening and access control by phone with your ADSL box
- No cost of communication with all types of phones without mandatory subscription
- Completely safe
- Wireless device
- Compatible with any motor and high-speed ADSL connection
- Family and friends can access the house in peace

## AUDIO AND VIDEO DOORMAN

Our audio or video solutions allow you to identify your visitors and secure your home.

# HELP WITH MEASUREMENTS

## Measurements between pillars and beneath caps

### Examples

- Start your measurements at the 0 point (the highest ground point)

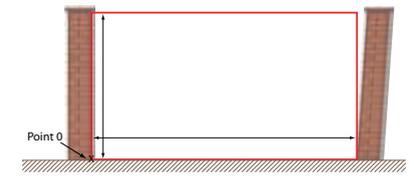

#### Ideal position:

- level ground
- vertical pillars

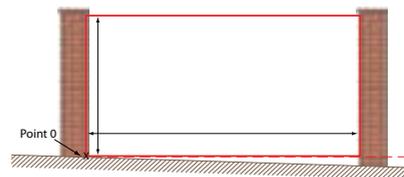

#### Position 3:

- level ground
- 1 vertical pillar and 1 leaning outwards

#### Position 1:

- sloping ground
- vertical pillars

#### Position 4:

- Level ground
- pillars leaning out

#### Position 2:

- uneven ground
- vertical pillars

#### Position 5:

- level ground
- pillars leaning in

## GATE AND FENCE ALIGNMENT

### Simple case

- Start your measurements at the 0 point (the highest ground point)

**Position** A gate with some units of fencing on one side. The wall is straight and regular, the posts are vertical.

**Problem** You want an alignment of the beams between the gate and the fencing.

**Solution** The height of the middle crossbeam of the gate will be determined by the bottom beam of the fencing (so this height depends on the height of the fence wall). The height of the top beam of the fence (and thus the height of the fence) is determined by the height of the top beam of the gate.

If the vertical drop of the fence wall is too big, it is necessary to plan to have a mason re-level the fence wall before all measurements are taken.

### In all cases

- The rules set out for the "simple" case still apply
- The height of the middle crossbeam of the gate will be aligned with the nearest fence unit.

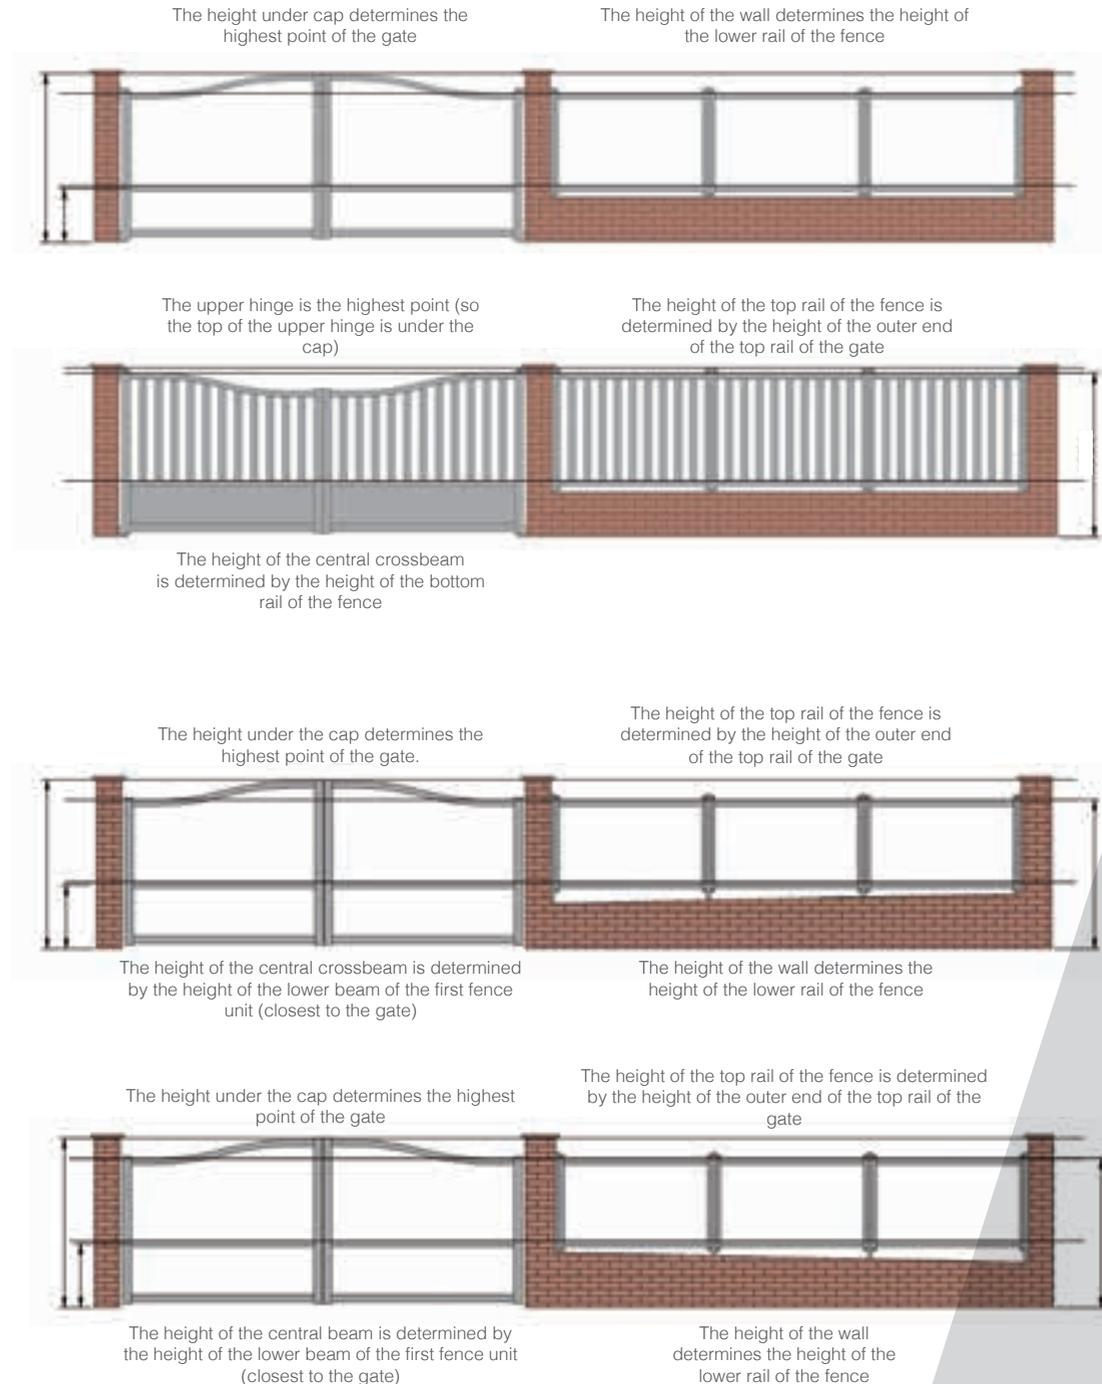

## SLOPING FENCE WALL

### Uphill slope

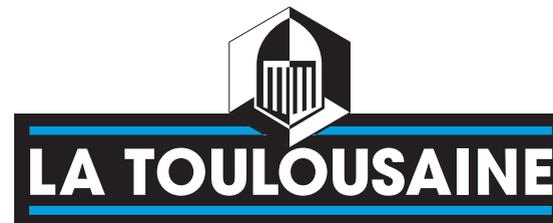

The height of the bottom crossbeam of the fence will be adapted to the highest point of the fence wall here: on the far right.

### Downhill slope

The height of the bottom crossbeam of the fence will be adapted to the highest point of the fence wall here: on the left.
