4000 Series flush and surface mount rainshields offer additional cover protection from the elements.

Rainshields are now available for the 4000 series modular range to fit both flush and surface back boxes (with one, two or three modules).

Available in the standard 4000 series “gunmetal grey” finish and are manufactured from aluminium alloy.

The rainshields offer additional protection without detracting from the aesthetics of the entry panel. The flush rainshield also presents a larger cover area to the back box cutout making it easier to install and seal the panel on uneven surfaces.
