
VANDAL RESISTANT FIREMAN SWITCHES

CRESCENT KEY AND DROP KEY FIREMAN SWITCHES

FS/CK

171E/SB

FS/DK

170E/S/SH

**Robust heavy duty
crescent key and
drop key fireman
switches.**

These Vandal Resistant fireman switches are manufactured from durable 12 gauge, 316 grade brushed stainless steel with both drop key and crescent key versions available.

The switches have a flush galvanised back box as standard, however an optional surface box (**171E/SB**) is available for the crescent key switch and a surface drop key switch (**170E/S/SH**) is available.

The drop key affords a higher level of security against misuse than other conventional fireman switches, this is achieved through the shape of the key used to operate the switch.

The drop key fireman switch is fitted with a double pole heavy duty DPDT micro switch, while the crescent key switch has a single pole SPDT micro switch.
