

# IP SYSTEM AND VIDEOKITS

## IPVK AND IPVR VIDEOKITS

IP system for communication via a LAN, WAN or private network.

Introducing a new range of IP intercom products for communication via a LAN, WAN or private network. WiFi can also be used to communicate with tablets and smart phones running the Videx app. The system is also available as a kit which includes the entrance panel, videophone and power supply.

The 4000 Series modular entrance panel can be expanded from 1 up to 42 call buttons and include any of the extensive range of 4000 Series modules available. It can be surface or flush mounted and is available in a number of finishes and panel sizes.

Vandal Resistant entrance panels are manufactured from 12 gauge 316 grade stainless steel and can be expanded from 1 up to 40 call buttons. Bespoke panel sizes are also available upon request.

All entrance panels include a wide angle colour camera, call progress LED's and an input for a second camera. There are two relay outputs and two free inputs which can be used for a variety of functions such as door/gate release and activation of auxiliary functions.

The videophone is in the popular 6200 series design and incorporates a 3.5" touch screen display for both viewing visitors and navigating the function menu's. The videophone is wall mountable and an optional desk kit is also available. Power options include POE or a 12Vdc power supply, additional input/outputs are included for auxiliary functions.

Additional system features include a call log with picture capture of the caller, intercommunication between devices in the same apartment or others and up to 16 videophones per apartment.
