INSTALLATION INSTRUCTIONS

1. Slot the gate frame to take the lock body and cut two holes for the eurocylinder.
2. Fix lock and forend plate in position, insert the eurocylinder and secure with M5 countersunk screw.
3. Fix 2x eurocylinder escutcheons.
4. Check lock operates smoothly.
5. To change the hand of the latch: undo the slotted screw at the rear of the lock, rotate latch and tighten slotted screw.

MAINTENANCE

Every 3 months:

Lubricate with light oil periodically.
